Connect to the ABM Generator GCP Project

From scratch on a Mac. Copy each command into Terminal and press Enter.

Project details

Project name	ABMGenerator
Project ID	`abmgenerator`
Project number	`979669242383`
Region	us-central1

Step 1: Install Homebrew (skip if you already have it)

Check first. If this prints a version number, skip to Step 2.

```
brew --version
```

If you see "command not found", install Homebrew:

```
/bin/bash -c "$(curl -fsSL
https://raw.githubusercontent.com/Homebrew/install/HEAD/install.sh)"
```

Step 2: Install the Google Cloud CLI

```
brew install --cask google-cloud-sdk
```

Check that it worked:

```
gcloud --version
```

Step 3: Set the project to ABMGenerator

```
gcloud config set project abmgenerator
```

Step 4: Sign in with the ABMGenerator account

A browser window opens. Sign in with the Google account that has access to ABMGenerator.

```
gcloud auth login
```

Then sign in for application code as well. This is what the apps and scripts use:

```
gcloud auth application-default login
```

Step 5: Connect the project and its number

Set the quota project, so usage is billed and counted against ABMGenerator:

```
gcloud auth application-default set-quota-project abmgenerator
```

Confirm that the project ID and number match the details above:

```
gcloud projects describe abmgenerator --format="value(projectId,projectNumber)"
```

Expected output: `abmgenerator 979669242383`

Step 6: Confirm the connection

```
gcloud config list
```

The output should show `project = abmgenerator`.

> **Only ABMGenerator is connected.** The commands above set one project. If you use other Google Cloud projects, they are not changed.

If something goes wrong

What you see	What to do
`command not found: gcloud`	Close and reopen Terminal, then run Step 2 again.
Permission denied, or project not found	You signed in with the wrong Google account. Run Step 4 again and choose the account that has access to ABMGenerator.
Project number is not 979669242383	Stop and tell the project owner. You may be looking at a different project.
